NOTICE OF ALLOWABILITY

Status of the Claims

This action is in response to papers filed 18 April 2008 in which a Terminal Disclaimer was submitted. The previous rejection in the Office Action dated 15 January 2008 under obviousness-type double patenting is withdrawn in view of the Terminal Disclaimer, placing the pending claims in condition for allowance.

Claims 1-13 are in condition for allowance.

Extension of Time

An extension of time under 37 CFR 1.136(a) is required to place this application in condition for allowance. During a telephone conversation conducted on 6 May 2008, Tim Evans requested an extension of time for 1 MONTH(S) and authorized the Director to charge Deposit Account No. 50-1446 the required fee of \$120.00 for this extension.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The claims are drawn to biochips having spots of differing concentration, but uniform detection sensitivity. The closest prior art is that of Okamoto who teaches inkjet deposition of DNA solutions onto a support, DNA solutions each having a different concentration of DNA (Example 3). Okamoto deposits the first concentration then recovers the spotted material to measure the amount of DNA contained within the spot and then compares

the measured amount to a theoretical amount based on DNA concentration. Okamoto repeats this, deposition, recovery, measuring and comparison for each concentration of DNA. Okamoto does not deposit multiple concentrations onto a single support and hence does not teach a support having spots of different concentration. Furthermore, the reference would not suggest making such an array of spots as instantly claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 1-13 are allowed.
